INSTALLATION INSTRUCTIONS

DANDYLINE CLOTHESLINES

Fasteners must be screwed into structural elements (timber, brick, concrete).
We do not recommend fixing to cladding material or using plasterboard anchors.

Assemble components as per diagram. Leaving the line folded down may make assembly and installation easier.

Fix to the wall using 10 or 12 Gauge screw (not supplied) of sufficient length depending on the wall material to screw unit securely to the wall in the desired location.

Use a spirit level on the rear spreader bar to ensure the line is level.

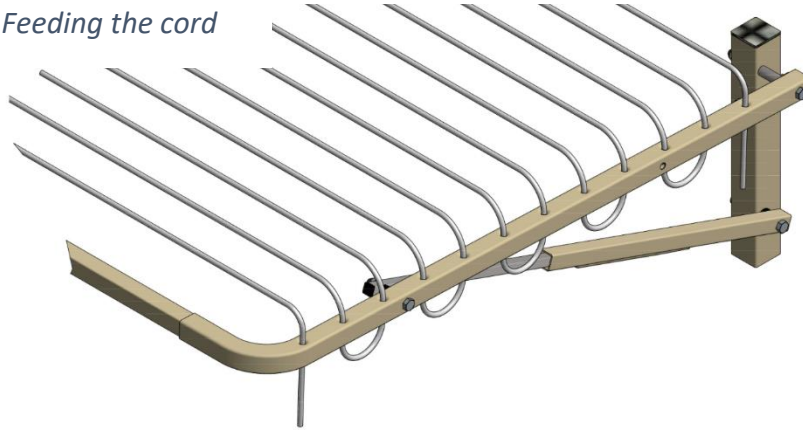

Fold out the arm and hold in place using the wire Stay.

Wall Fixing Point holes can be re-drilled if required to match location of structural elements without voiding any warranty.

Feeding the cord: (Drawings for illustration purposes only)

- Unroll the cord.
TIP: Always keep hold of the loose ends as this will prevent tangles.
- Feed one end down the hole closest to the wall allowing approx. 300mm for tying.
- Tie off as shown in the Figs 3 and 4.
- Feed the cord through the remaining holes as shown in Fig 2.

Figure 2 – Feeding the cord

- To tension the cord, hold the free end tightly. Starting at the line closest to the wall, pull down firmly on the middle of the cord. Repeat the process on the next cord, working your way outwards removing any slack. Repeat the process until there is sufficient tension in the cord.
- Tie the loose end as shown in Figs 3 and 4. Trim the ends of the cord, leaving 100mm to be fed through the hole as shown in Fig 4.
